Foreword

The Board of Directors of the American Board for Certification in Orthotics, Prosthetics and Pedorthics Inc., (ABC) developed this *Orthotic, Prosthetic and Pedorthic Scope of Practice* document for use by orthotic, prosthetic and pedorthic professionals, consumers, members of the rehabilitation team, health care decision makers and legislative and regulatory officials.

To write this consensus document, ABC used a variety of resources including:

- The 2003 ABC *Orthotics and Prosthetics Scope of Practice* document
- The 2007 ABC *Practice Analysis of Certified Practitioners in the Disciplines of Orthotics and Prosthetics*
- The former Board for Certification in Pedorthics *Role Delineation Study and Scope of Practice for Certified Pedorthists*
- ABC *Practice Analysis Studies* for orthotic fitters and mastectomy fitters
- Curriculum from a sampling of orthotic, prosthetic, pedorthic and fitter educational programs

This *Orthotic, Prosthetic and Pedorthic Scope of Practice* document defines several aspects of the orthotic, prosthetic and pedorthic professions including the delineation of the scopes of practice and the specific responsibilities of ABC credentialed individuals.

The practice of orthotics, prosthetics and pedorthics occurs in various settings, including independent private orthotic, prosthetic or pedorthic practices, hospitals, inpatient and outpatient rehabilitation facilities, rural outreach clinics, home health settings, short term nursing facilities and long term care settings. ABC credentialed professionals play a critical role in the rehabilitation of individuals in need of orthotic, prosthetic or pedorthic care.

Any scope of practice document should be revised periodically, and it is the intent of ABC to revise this document as the practice of orthotics, prosthetics and pedorthics evolves.

This publication represents the shared efforts of many dedicated individuals. ABC is grateful for the commitment of the task force members and staff that devoted their time and effort to this project.

Michael J. Allen, CPO, FAAOP
Immediate Past President

SECTION 1

ABC Credentials

The American Board for Certification in Orthotics, Prosthetics and Pedorthics, Inc. (ABC) establishes and promotes the highest standards of organizational and clinical performance in the delivery of orthotic, prosthetic and pedorthic care. ABC advances the competency of practitioners, promotes the quality and effectiveness of orthotic, prosthetic and pedorthic care and maintains the integrity of the profession.

ABC orthotist, prosthetist, pedorthist, and fitter certification and assistant and technician registration are the designations given to those individuals who have met ABC's extensive education and clinical training requirements and who have passed specific examinations that are based on a comprehensive practice analysis of the orthotic, prosthetic and pedorthic professions. The examinations measure the candidate's knowledge of orthotics, prosthetics and pedorthics, their analytical and problem solving skills as well as clinical, patient management and communication skills. ABC orthotist, prosthetist, pedorthist, assistant, fitter and technician credentials are the profession's highest standards for individuals providing patient care and technical services.

ABC awards the following credentials:

ABC Certified Orthotist (CO)

ABC Certified Prosthetist (CP)

ABC Certified Prosthetist/Orthotist (CPO)

ABC Certified Pedorthist (C.Ped.)

ABC Certified Fitter-Orthotics (CFo)

ABC Certified Fitter-Mastectomy (CFm)

ABC Certified Fitter-Orthotic Mastectomy (CFom)

ABC Certified Fitter-Therapeutic Shoes (CFts)

ABC Registered Orthotic Assistant (ROA)

ABC Registered Prosthetic Assistant (RPA)

ABC Registered Prosthetic-Orthotic Assistant (RPOA)

ABC Registered Orthotic Technician (RTO)

ABC Registered Prosthetic Technician (RTP)

ABC Registered Prosthetic-Orthotic Technician (RTPO)

SECTION 2

Delineation of Scopes of Practice

ABC Certified Orthotist, Prosthetist, or Prosthetist/Orthotist

An ABC certified orthotist and/or prosthetist is a health care professional who is specifically educated and trained to manage comprehensive orthotic and/or prosthetic patient care. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.

Orthotic care may include, but is not limited to, patient evaluation, orthosis design, fabrication, fitting and modification to treat a neuromusculoskeletal disorder or acquired condition.

Prosthetic care may include, but is not limited to, patient evaluation, prosthesis design, fabrication, fitting and modification to treat limb loss for purposes of restoring physiological function and/or cosmesis.

The orthotist and/or prosthetist certified by ABC is bound by the ABC Code of Professional Responsibility which is enforced by a Professional Discipline program. The certified orthotist/prosthetist is obligated to support and conform to professional responsibilities that promote and assure the overall welfare of the patient and the integrity of the profession. The time limited certification expires without compliance with requirements of the Mandatory Continuing Education program. The practice of an ABC certified orthotist and/or prosthetist includes, but is not limited to:

- 1) Assessment of patients with impairment of human movement or musculoskeletal abnormalities that would impede their ability to participate in their social environment or other activities in order to determine a functional intervention. Patient assessment may include, but is not limited to, the evaluation of:
 - anthropometric data
 - cognition
 - circulation
 - skin integrity
 - protective sensation
 - pain
 - central and peripheral nerve integrity
 - respiratory capacity
 - biomechanics
 - gait analysis including temporal and spatial assessment
 - range of motion
 - muscle strength
 - posture and balance
 - proprioception

-
- orthotic and/or prosthetic requirements
 - myoelectric activity and potential
 - activities of daily living
 - environmental barriers including social, home, and work reintegration
 - the need for physical and occupational therapy modalities
- 2) Formulation of a treatment plan based upon a comprehensive assessment to design an intervention to alleviate limitations and enhance function. Orthotic and prosthetic treatment includes, but is not limited to:
- verification of prescription/documentation
 - evaluation of the prescription rationale
 - a needs assessment based on patient and/or caregiver input
 - development of functional goals
 - analysis of structural and design requirements
 - assessment of potential physical and occupational therapy requirements
 - consultation with and/or referral to other health care professionals
- 3) Implementation of the orthotic and/or prosthetic treatment plan includes, but is not limited to:
- acquisition of anthropometric data
 - modification and/or rectification of anthropometric data
 - preparatory care
 - material selection
 - fabrication of orthoses and/or prostheses
 - prototype development including evaluative wear
 - structural evaluation
 - diagnostic fitting
 - assessment of intervention
 - functional exercise
 - gait training
 - functional training (both self care and work related)
 - patient education and instruction
 - supervision of the provision of care
- 4) Utilization of a follow-up treatment plan that ensures successful orthotic and/or prosthetic outcomes, patient health and quality of life which includes, but is not limited to:
- documentation of functional changes
 - formulation of modifications to ensure successful outcomes
 - reassessment of patient expectations
 - reassessment of treatment objectives
 - development of long term treatment plan
 - confirmation of patient education and instruction
 - evidence based practice

-
-
- 5) Compliance with practice management plans to develop and document policies and procedures to ensure patient protection which includes, but is not limited to:
- adherence to applicable local, state and federal laws and regulations
 - following patient care guidelines and procedures
 - maintaining a safe and professional environment for patient care
 - comprehension of claims development and submission
- 6) Promotion of competency and enhancement of orthotic and/or prosthetic professional practice to contribute to the profession's body of knowledge includes, but is not limited to participation in:
- continuing education
 - training of residents/students
 - clinical research
 - evidence based studies
 - promotion of public awareness of the orthotic and/or prosthetic profession
 - consumer organizations, governmental and non-governmental organizations

ABC Certified Pedorthist

An ABC certified pedorthist is a health care professional who is specifically educated and trained to manage comprehensive pedorthic patient care. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management. An ABC certified pedorthist fits, fabricates, adjusts, or modifies devices which reflect his/her education and training.

The profession of pedorthics is the provision of patient care and services by or under the direction and supervision of an ABC certified pedorthist to provide the application of a pedorthic device for the prevention or amelioration of painful and/or disabling conditions of the foot and ankle. A prescription is required for any pedorthic device, modification, and/or prefabricated below the knee orthosis addressing a medical condition that originates at the ankle or below.

“Pedorthic devices” means therapeutic shoes, shoe modifications made for therapeutic purposes, below the ankle partial foot prostheses, and foot orthoses. It also includes subtalar-control foot orthoses (SCFO) designed to manage the function of the anatomy by primarily controlling the range of motion of the subtalar joint. Excluding footwear, the proximal height of a custom pedorthic device does not extend beyond the junction of the gastrocnemius and the Achilles tendon. Pedorthic devices do not include non-therapeutic inserts or footwear regardless of method of manufacture; unmodified, non-therapeutic over-the-counter shoes; or prefabricated foot care products. “Therapeutic” devices address a medical condition, diagnosed by a prescribing medical professional, while “non-therapeutic” devices do not address a medical condition.

The pedorthist certified by ABC is bound by the ABC Code of Professional Responsibility which is enforced by a Professional Discipline program. The certified pedorthist is obligated to support and conform to professional responsibilities that promote and assure the overall welfare of the patient and the integrity of the profession. The time limited certification expires without compliance with the Mandatory Continuing Education program. The practice of an ABC certified pedorthist includes but is not limited to:

- 1) Assessment of patients with impairment of human movement or musculoskeletal abnormalities that would otherwise impede their ability to participate in their social environment or other activities in order to determine a functional intervention. Pedorthic patient assessment may include, but is not limited to, the evaluation and documentation of:
 - anthropometric data
 - cognition
 - circulation
 - skin integrity
 - protective sensation
 - pain
 - peripheral nerve integrity

-
-
- respiratory capacity
 - biomechanics
 - gait analysis including temporal and spatial assessment
 - range of motion
 - muscle strength
 - posture and balance
 - proprioception
 - pedorthic requirements
 - environmental barriers including social, home, and work reintegration
- 2) Formulation of a treatment plan based upon a comprehensive assessment to design an intervention to alleviate limitations and enhance function. Pedorthic treatment includes, but is not limited to:
- verification of prescription/documentation
 - evaluation of the prescription rationale
 - a needs assessment based on patient and/or caregiver input
 - development of functional goals
 - analysis of structural and design requirements
 - consultation with and/or referral to other health care professionals
- 3) Implementation of the pedorthic treatment plan includes but is not limited to:
- acquisition of anthropometric data
 - modification and/or rectification of anthropometric data
 - material selection
 - fabrication of pedorthic devices
 - device structural evaluation
 - diagnostic fitting
 - gait training
 - assessment of intervention for appropriate outcomes
 - patient education and instruction
 - supervision of the provision of care
- 4) Utilization of a follow-up treatment plan that ensures successful pedorthics outcomes, patient health and quality of life which includes, but is not limited to:
- documentation of functional changes
 - formulation of modifications to ensure successful outcomes
 - reassessment of patient expectations
 - reassessment of treatment objectives
 - development of long term treatment plan
 - confirmation of patient education and instruction
 - evidenced based practice

-
-
- 5) Compliance with practice management plans to develop and document policies and procedures to ensure patient protection includes, but is not limited to:
- adherence to applicable local, state and federal laws and regulations
 - following patient care guidelines and procedures maintaining a safe and professional environment for patient care
 - comprehension of claims development and submission
- 6) Promotion of competency and enhancement of pedorthic professional practice to contribute to the profession's body of knowledge includes, but is not limited to participation in:
- training of residents/students
 - continuing education
 - clinical research
 - evidence based studies
 - promotion of public awareness of the pedorthic profession
 - consumer organizations, governmental and non-governmental organizations

ABC Certified Fitter-Orthotics:

An ABC certified fitter-orthotics is a health care professional who is specifically educated and trained in the provision of certain orthoses. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.

An ABC certified fitter-orthotics is competent to practice orthotics within a scope of practice that is specific to fitting certain custom fitted, prefabricated and off-the-shelf orthoses as described below:

- Cervical orthoses, except those used to treat an unstable cervical condition
- Prefabricated orthoses for the upper and lower extremities, except those used in the initial and/or acute treatment of long bone fractures and dislocations, therapeutic (diabetic) shoes/inserts and functional electrical stimulation orthoses (e.g. myo-orthosis, neuroprosthesis)
- Prefabricated spinal orthoses, except those used in the treatment of scoliosis or unstable spinal conditions, including halo cervical orthoses
- Pressure gradient garments
- Trusses

The ABC certified fitter-orthotics is bound by the ABC Code of Professional Responsibility which is enforced by a Professional Discipline program. The certified fitter-orthotics is obligated to support and conform to professional responsibilities that promote and assure the overall welfare of the patient and the integrity of the profession. The time limited certification expires without compliance with the Mandatory Continuing Education program. The practice of an ABC certified fitter-orthotics includes, but is not limited to:

- 1) Assessment of prescription or patient's needs for prefabricated orthoses includes, but is not limited to, the evaluation of the following:
 - physical assessment
 - circulation
 - skin integrity
 - posture
 - orthotic requirements
- 2) Formulation of a treatment plan based upon an assessment to alleviate limitations and enhance function. The orthotic fitter's treatment includes, but is not limited to:
 - verification of prescription/documentation
 - consultation with and/or referral to other health care professionals
- 3) Implementation of the orthotic fitter's treatment plan includes, but is not limited to:
 - acquisition of physical assessment data
 - adjustments to accommodate individual anatomic contours
 - structural evaluation
 - patient education and instruction

-
-
- 4) Utilization of a follow-up treatment plan that ensures successful orthotic outcomes, patient health and quality of life which includes, but is not limited to:
 - documentation of functional changes
 - formulation of modifications to ensure successful outcomes
 - confirmation of patient education and instruction

 - 5) Compliance with practice management plans to develop and document policies and procedures to ensure patient well being which includes, but is not limited to:
 - adherence to applicable local, state and federal laws and regulations
 - following patient care guidelines and procedures
 - maintaining a safe and professional environment for patient care
 - comprehension of claims development and submission

 - 6) Promotion of competency and enhancement of orthotic professional practice to contribute to the profession's body of knowledge includes, but is not limited to, participation in:
 - continuing education
 - promotion of public awareness of the orthotic profession
 - consumer organizations, governmental and non-governmental organizations

ABC Certified Fitter-Mastectomy

An ABC certified fitter-mastectomy is a health care professional who is specifically educated and trained in the provision of breast prostheses and post-mastectomy services. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.

The ABC certified fitter-mastectomy is bound by the ABC Code of Professional Responsibility which is enforced by a Professional Discipline program. The certified fitter-mastectomy is obligated to support and conform to professional responsibilities that promote and assure the overall welfare of the patient and the integrity of the profession. The time limited certification expires without compliance with the Mandatory Continuing Education program. The practice of an ABC certified mastectomy fitter includes, but is not limited to:

- 1) Assessment of specific prescription or patient's needs for breast prostheses as it relates to or includes, but is not limited to, the evaluation of the following:
 - physical assessment
 - circulation
 - skin integrity
 - posture and balance
 - mastectomy prosthetic requirements
- 2) Formulation of a treatment plan based upon an assessment to alleviate limitations and enhance function. The mastectomy fitter's treatment includes, but is not limited to:
 - verification of prescription/documentation
 - a needs assessment based on patient and/or caregiver input
 - analysis of design requirements
 - consultation with and/or referral to other health care professionals
- 3) Implementation of the mastectomy fitter's treatment plan includes, but is not limited to:
 - acquisition of physical assessment data
 - material selection
 - diagnostic fitting
 - adjustments to accommodate individual anatomic contours
 - patient education and instruction
- 4) Utilization of a follow-up treatment plan that ensures successful mastectomy prosthetic outcomes, patient health and quality of life which includes but is not limited to:
 - documentation of any changes in patient's condition
 - formulation of modifications to ensure successful outcomes
 - confirmation of patient education and instruction

-
-
- 5) Compliance with practice management plans to develop and document policies and procedures to ensure patient well being which includes, but is not limited to:
 - adherence to applicable local, state and federal laws and regulations
 - following patient care guidelines and procedures
 - maintaining a safe and professional environment for patient care
 - comprehension of claims development and submission
 - 6) Promotion of competency and enhancement of post-mastectomy professional practice to contribute to the profession's body of knowledge includes, but is not limited to, participation in:
 - continuing education
 - promotion of public awareness of the post-mastectomy profession
 - consumer organizations, governmental and non-governmental organizations

ABC Certified Fitter-Therapeutic Shoes

An ABC certified fitter-therapeutic shoes is a health care professional who is specifically educated and trained to provide non-custom therapeutic shoes and non-custom multi-density inserts. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.

The ABC certified fitter-therapeutic shoes is bound by the ABC Code of Professional Responsibility which is enforced by a Professional Discipline program. The certified fitter-therapeutic shoes is obligated to support and conform to professional responsibilities that promote and assure the overall welfare of the patient and the integrity of the profession. The time limited certification expires without compliance with the Mandatory Continuing Education program. The practice of an ABC certified fitter-therapeutic shoes includes, but is not limited to:

- 1) Assessment of specific prescription or patient's needs for therapeutic shoes as it relates to or includes, but is not limited to, the evaluation of the following:
 - physical assessment
 - circulation
 - skin integrity
 - protective sensation
 - pain
 - therapeutic shoe requirements
 - environmental barriers including social, home, and work reintegration
- 2) Formulation of a treatment plan based upon an assessment to alleviate limitations and enhance function. The therapeutic shoe fitter's practice includes, but is not limited to:
 - verification of prescription/documentation
 - analysis of shoe construction needs and design requirements
 - consultation with and/or referral to other health care professionals
- 3) Implementation of the therapeutic shoe fitter's treatment plan includes, but is not limited to:
 - measuring patient for shoes
 - material selection
 - shoe fit evaluation
 - minor adjustments to accommodate individual anatomic contours
 - patient education and instruction
- 4) Utilization of a follow-up treatment plan that ensures successful outcomes, patient health and quality of life which includes, but is not limited to:
 - documentation of functional changes
 - minor adjustments to the fit of the shoe to ensure successful outcomes
 - confirmation of patient education and instruction

-
-
- 5) Compliance with practice management plans to develop and document policies and procedures to ensure patient well being which includes, but is not limited to:
- adherence to applicable local, state and federal laws and regulations
 - following patient care guidelines and procedures
 - maintaining a safe and professional environment for patient care
 - understanding claims development and submission
- 6) Promotion of competency and enhancement of professional practice to contribute to the profession's body of knowledge includes, but is not limited to, participation in:
- continuing education
 - promotion of public awareness of the profession
 - consumer organizations, governmental and non-governmental organizations

ABC Registered Orthotic and/or Prosthetic Assistant

An ABC registered assistant is an individual educated and trained to participate in comprehensive orthotic and/or prosthetic care while under the supervision of an ABC certified orthotist and/or ABC certified prosthetist.

Registered assistants, under the supervision of an ABC certified orthotist and/or ABC certified prosthetist may perform orthotic and/or prosthetic procedures and related tasks in the management of patient care. The registered assistant may also fabricate, repair and maintain orthoses and/or prostheses. ABC registered assistants may not use their credentials as independent practitioners engaged in patient care.

The registered assistant is bound by the ABC Code of Professional Responsibility, which is enforced by a Professional Discipline program. The registered assistant is obligated to support and conform to professional responsibilities that promote and assure the overall welfare of the patient and the integrity of the profession. The time limited certification expires without compliance with the Mandatory Continuing Education program. The practice of an ABC registered orthotic/prosthetic assistant includes, but is not limited to:

- 1) Participation in the assessment of patients with impairment of human movement or musculoskeletal abnormalities that would impede their ability to participate in their social environment or other activities in order to determine a functional intervention. Patient assessment may include but is not limited to the evaluation of:
 - anthropometric data
 - cognition
 - circulation
 - skin integrity
 - protective sensation
 - pain
 - respiratory capacity
 - range of motion
 - muscle strength
 - posture and balance
 - proprioception
 - orthotic and prosthetic requirements
 - environmental barriers including social, home and work reintegration

-
-
- 2) Implementation of the established orthotic or prosthetic treatment plan which includes, but is not limited to:
 - acquisition of anthropometric data
 - modification and/or rectification of physical data
 - preparatory care
 - material selection
 - fabrication
 - prototype development including evaluative wear
 - structural evaluation
 - diagnostic fitting
 - assessment of intervention for appropriate outcomes
 - gait training
 - functional training (both self care and work related)
 - patient education and instruction

 - 3) Utilization of a follow-up treatment plan that ensures successful orthotic and/or prosthetic outcomes, patient health and quality of life which includes, but is not limited to:
 - documentation of functional changes
 - formulation of modifications within the established plan of care to ensure successful outcomes
 - reassessment of patient expectations
 - reassessment of treatment objectives
 - assist in development of long term treatment plan
 - confirmation of patient education and instruction
 - evidenced based practice

 - 4) Compliance with practice management plans to develop and document policies and procedures to ensure patient well being which includes, but is not limited to:
 - adherence to applicable local, state and federal laws and regulations
 - following patient care guidelines and procedures
 - maintaining a safe and professional environment for patient care
 - understanding claims development and submission

 - 5) Promotion of competency and enhancement of orthotic and/or prosthetic professional practice to contribute to the profession's body of knowledge includes, but is not limited to, participation in:
 - continuing education
 - training of residents/students
 - clinical research
 - evidence based studies
 - promotion of public awareness of the orthotic and/or prosthetic profession
 - consumer organizations, governmental and non-governmental organizations

Registered Orthotic and/or Prosthetic Technician

An ABC registered technician is an individual trained and qualified to assist an ABC credentialed individual by providing technical support. ABC registered technicians may not use their credentials as independent practitioners. The registered technician fabricates, repairs and maintains orthoses and/or prostheses. The registered technician is proficient with current fabricating techniques, familiar with material properties and skilled in the use of appropriate equipment.

The registered technician is bound by the ABC Code of Professional Responsibility, which is enforced by a Professional Discipline program. The registered technician is obligated to support and conform to professional responsibilities that promote and assure the overall welfare of the patient and the integrity of the profession. The time limited certification expires without compliance with the Mandatory Continuing Education program. The practice of an ABC registered orthotic and/or prosthetic technician includes, but is not limited to:

- 1) Assessment of orthotic and/or prosthetic technical requirements. Technical assessment may include but is not limited to the evaluation of the following information:
 - physical assessment data
 - range of motion requirements
 - orthotic/prosthetic requirements
 - material selection
 - component application
 - structural analysis
 - device specific function

- 2) Formulation of fabrication requirements within the established treatment plan. This formulation includes, but is not limited to:
 - verification of documentation
 - consultation with manufacturing professionals as required
 - analysis of structural and design needs for implementation
 - development of device specific functional goals
 - consultation with clinicians and peers

-
-
- 3) Implementation of the fabrication requirements includes, but is not limited to:
 - application of physical data
 - modification and/or rectification of physical data
 - material selection
 - fabrication
 - structural evaluation
 - compliance with component selection and manufacturer recommendations
 - assessment of intervention for appropriate outcomes

 - 4) Utilization of a follow-up treatment plan that ensures successful fabrication outcomes which includes, but is not limited to:
 - documentation of structural changes
 - formulation of modifications to ensure successful outcomes
 - development of long term service plan

 - 5) Compliance with practice management plans, policies and procedures which includes, but is not limited to:
 - adherence to applicable local, state and federal laws and regulations
 - following patient care guidelines and procedures
 - maintaining a safe and professional environment
 - application of manufacturer's guarantees, and conditions of use
 - performing applicable machine maintenance and calibration
 - maintaining applicable records of components, machines and other necessary equipment

 - 6) Promotion of competency and enhancement of professional practice to contribute to the profession's body of knowledge includes, but is not limited to participation in:
 - continuing education
 - training of residents and students
 - evidence based studies
 - promotion of public awareness of the profession
 - consumer organizations, governmental and non-governmental organizations

Section 3

Glossary

ABC

The American Board for Certification in Orthotics, Prosthetics and Pedorthics, Inc. (ABC) establishes and promotes the highest standards of organizational and clinical performance in the delivery of orthotic, prosthetic and pedorthic care. It is the mission of ABC to advance the competency of practitioners, promote the quality and effectiveness of orthotic, prosthetic and pedorthic care and maintain the integrity of the profession.

Anthropometric

Pertaining to the measurement of the size, weight and proportion of the human body.

CAAHEP

The Commission on Accreditation of Allied Health Education Programs (CAAHEP) is a nationally recognized nonprofit organization that accredits educational programs in allied health disciplines.

CAD/CAM

Computer-aided design/computer-aided manufacture.

Cognition

The operation of the mind by which we become aware of objects of thought or perception; it includes aspects of perceiving, thinking and remembering.

Custom Fabricated Device

An orthosis, prosthesis or pedorthic device fabricated to comprehensive measurements and/or a mold or patient model for use by a patient in accordance with a prescription and which requires clinical and technical judgment in its design, fabrication and fitting.

Custom Fitted Device

A prefabricated orthosis or pedorthic device which is manufactured in quantity without a specific patient in mind. The device may be supplied as separate prefabricated components that require some assembly and/or fitting and adjustment. These orthoses or pedorthic devices must be trimmed, bent, molded (with or without heat), or otherwise modified for use by a specific patient.

Functional Electrical Stimulation

Functional electrical stimulation provides a low level electrical current which results in the movement of a body part to accomplish a specific task. These systems impart transcutaneous stimulation of nerve and/or muscle groups.

Mandatory Continuing Education

ABC credentialed individuals are required to maintain competency through mandatory continuing education by earning professional continuing education credits.

Mastectomy Fitter

A health care professional who is specifically educated and trained in the provision of breast prostheses and post-mastectomy services. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.

NCOPE

The National Commission on Orthotic and Prosthetic Education (NCOPE) is the accreditation body for the orthotic and prosthetic professions and the approval body for the pedorthic profession. NCOPE works in cooperation with CAAHEP. NCOPE's primary mission is to ensure education and/or residency programs meet minimum standards of quality to prepare individuals to enter these professions.

Non-custom Therapeutic Shoes

Shoes that meet the criteria of the Medicare Therapeutic Shoe Bill and that match the diabetic shoe descriptor, i.e. "off the shelf depth-inlay shoe manufactured to accommodate multi-density insert(s)"; shoes that are not custom fabricated from a mold of the patient's foot.

Non-custom Multi-Density Inserts

Inserts that meet the criteria of the Medicare Therapeutic Shoe Bill that match the diabetic insert descriptor, i.e. "multi-density insert, direct formed, molded to foot after external heat source of 230 degrees Fahrenheit or higher, total contact with patient's foot, including arch, base layer minimum of ¼ inch material of Shore A 35 durometer or 3/16 inch of Shore A durometer (or higher), prefabricated"; inserts that are not custom fabricated from a mold of the patient's foot.

Neuroprosthetics

A discipline related to neuroscience and biomedical engineering concerned with developing neural prostheses, artificial devices to replace or improve the function of an impaired nervous system.

Off-the-Shelf Device

A prefabricated orthosis sized and/or modified for interim, evaluative or short term use by the patient, in accordance with a prescription and which does not require clinical judgment and substantive alteration for appropriate use.

Orthosis

A custom designed, custom fabricated, custom fitted, prefabricated and/or modified device to treat a neuromusculoskeletal disorder or acquired condition.

Orthotic Fitter

A health care professional who is specifically educated and trained in the provision of prefabricated orthoses, with the exception of those orthoses noted in this publication. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.

Orthotist

A health care professional who is specifically educated and trained to manage comprehensive orthotic patient care. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.

Pedorthic Device

Pedorthic devices are therapeutic shoes, shoe modifications made for therapeutic purposes, below the ankle partial foot prostheses, and foot orthoses. It also includes subtalar-control foot orthoses (SCFO) designed to manage the function of the anatomy by primarily controlling the range of motion of the subtalar joint. Excluding footwear, the proximal height of a custom pedorthic device does not extend beyond the junction of the gastrocnemius and the Achilles tendon. Pedorthic devices do not include non-therapeutic inlays or footwear regardless of method of manufacture; unmodified, non-therapeutic over-the-counter shoes; or prefabricated foot care products. “Therapeutic” devices address a medical condition, diagnosed by a prescribing medical professional, while “non-therapeutic” devices do not address a medical condition.

Pedorthist

A health care professional who is specifically educated and trained to manage comprehensive pedorthic patient care. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management. An ABC Certified Pedorthist (C.Ped.) fits, fabricates, adjusts, or modifies devices which reflect his/her education and training.

Prefabricated Device

A prefabricated device is one which is manufactured in quantity without a specific patient in mind. The device may be supplied as separate prefabricated components that may require some assembly and/or fitting and adjustment. These devices may require some trimming, bending, molding (with or without heat), or modification for use by a specific patient.

Proprioception

Perception mediated by the sensory nerve ending in muscles, tendons, and joints that provides a sense of the body’s position by responding to stimuli from within the body.

Prosthesis

A custom designed, fabricated, fitted and/or modified device to treat partial or complete limb loss for purposes of restoring physiological function and/or cosmesis.

Prosthetist

A health care professional who is specifically educated and trained to manage comprehensive prosthetic patient care. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.

Residency

A one-year NCOPE approved supervised program to acquire practical clinical training in orthotics and/or prosthetics in a patient care setting that is part of the overall education required for ABC Orthotist and/or Prosthetist Certification.

Subtalar-Control Foot Orthosis (SCFO)

A lower extremity orthosis designed to manage the function of the anatomy distal to the ankle joint by primarily controlling the range of motion of the subtalar joint. The proximal height of a SCFO does not extend beyond the junction of the gastrocnemius and the Achilles tendon. A SCFO is a method of treatment for conditions related to the foot demanding additional surface area to control forces.

Supervision and Privileging of a Non-Credentialed Caregiver

The supervision and privileging of a non-credentialed caregiver must ensure appropriate, effective, ethical and safe delivery of patient care. The non-credentialed caregiver is privileged to assist in the provision of patient care according to written objective criteria. The patient care services provided by the non-credentialed caregiver must not exceed the scope of practice of the supervising ABC credentialed orthotist, prosthetist and/or pedorthist. The supervisor must be available for consultation throughout the patient care process, must review the results of care rendered by the supervised individual and is responsible for countersigning within 15 days all entries by the caregiver in the patient's clinical record.

Supervisor

The designated ABC certified orthotist, prosthetist or pedorthist who oversees and is responsible for the delivery of appropriate, effective, ethical and safe orthotic, prosthetic and/or pedorthic patient care.

Technician

An individual trained and qualified to assist an ABC credentialed individual by providing technical support. The technician fabricates, repairs and maintains orthoses and prostheses. The technician is proficient with current fabricating techniques, familiar with material properties and skilled in the use of appropriate equipment.

Therapeutic Shoe Fitter

A health care professional who is specifically educated and trained to provide non-custom therapeutic shoes and non-custom multi-density inserts. This includes patient assessment, formulation of a treatment plan, implementation of the treatment plan, follow-up and practice management.
